

**While you wait for your appointment, enjoy these activities to help you learn about the important role flu and pneumonia shots play in safeguarding your health.**

## WAITING ROOM WORKOUT

### QUICK FACTS

Together, pneumococcal-pneumonia and influenza are the sixth leading cause of death in the nation for older adults.

Influenza and most pneumococcal diseases can be prevented with safe vaccines.

You can't get the flu from the flu shot.

You can't get pneumococcal disease from the pneumonia shot.

The pneumonia shot can be given at any time during the year. You can even get it when you get your flu shot.

Medicare Part B pays for both shots if the person giving you these shots accepts Medicare Part B as payment in full.
