Let's Chat!

What are the various key components of integrated behavioral health?

How can those components be achieved using telemedicine?

- What makes it integrated?
- How does that happen in daily workflows?
- What are the patient outcomes?
- How does a provider/clinic get started?

How does it work for the patient?

How does it work
for the patient?

Questions & Answers

To help health care providers manage patient care during the coronavirus disease (COVID-19) pandemic, Mountain-Pacific Quality Health provides support for the adoption of telehealth. Offering telehealth services allows people with Medicare, who are at high-risk for contracting COVID-19 or have other conditions, to avoid exposure to health care professionals and other patients. It also helps providers maintain fee-for-service revenue while practicing physical distancing and wearing personal protection equipment (PPE).

The benefits of implementing telehealth will reach beyond the current pandemic, expanding options and providing flexibility for both providers and patients.

What questions do you have? See if your question has already been answered on our [FAQs](#) page. If you do not find the answer you need, submit a question.
